Executive Profile

Product leader with 10+ years shipping data platforms, SaaS products, and AI-powered features into production. Combines deep domain expertise in financial technology with modern product management practices – accelerating delivery through quantitative decision-making and cross-functional execution. Grew platform revenue from **\$5MM** to **\$25MM+**, scaled enterprise adoption to **200+ accounts**, and closed critical quality gaps from **90%** to **99.5%**.

Core Expertise

Product strategy & roadmap | AI/ML productization | Data platform design | Agile & Scrum | Stakeholder management | Quantitative analysis

Professional Experience

Acme Corp – San Francisco, CA

Senior Product Manager – Platform & Data Products *Jun 2021 - Present*

- Grew the company's data platform from **\$5MM** to **\$25MM+** annual revenue through new product launches and expanded enterprise partnerships.
- Launched **Acme Insights**, an AI-powered analytics product, from concept to **\$8MM** ARR in 18 months – now the company's fastest-growing product line.
- Established the Platform Engineering team's product practice, reducing average feature delivery time by **40%** through improved requirements and prioritization.
- Led adoption of OKR-based planning across 4 engineering teams, increasing feature hit rate from **60%** to **90%** quarter-over-quarter.

Product Manager – Core Platform *Aug 2019 - May 2021*

- Delivered the company's first REST API product, adopted by **75+** enterprise customers in the first year.
- Drove migration from legacy monolith to microservices architecture, reducing deployment time from **3 hours** to **15 minutes**.
- Founded the Product Analytics function, establishing data-driven decision-making across 3 product teams.

TechCorp Solutions – New York, NY

Senior Business Analyst – Trading Platforms *Mar 2015 - Jun 2017*

- Product lead for **TradeFlow**, an enterprise fixed-income trading platform serving **50+** institutional clients.
- Delivered a complete redesign of the portfolio analytics module, increasing daily active users by **120%**.
- Reduced trade settlement errors by **35%** through a redesigned validation workflow and real-time exception alerts.

DataFirst Inc. – New York, NY

Business Analyst – Data Products *Jan 2011 - Jan 2014*

- Product founder of **InsightHub**, a web platform serving **500K+** daily data requests to **2,000+** subscribers.

- Designed and shipped industry-first visualization tools, including interactive market data dashboards and automated reporting workflows.
- Won “**Best Data Product**” award in 2013 and 2014.
